BaïSB
CUT FLOWERS

Since 1905 Ball Company has been working to color the world with flowers and since 1992, Ball SB also joined this ideal to Color the World with diversity in cutflowers. Our focus is to work with you to be able to deliver exciting products from our growers to millions of people. But, more than products, we are delivering emotions. Flowers are much more than a plant. They are living organisms reserved and used to express happiness, gratitude, love, excitement. They are present in peoples' most important days and occasions such as weddings, religious ceremonies, festivities, carnivals, love declarations, birthdays and much more. This is because flowers help us express emotions without even saying them, they remind us of the important things in life, they bring joy to people with just looking at them, and they brighten any room. Flowers help us tell stories, they reduce stress levels, they awake most of our senses: sight, smell and touch, and they lift up our moods.

Thank you for helping us to spread emotions around the world,

What are flowers to you.?

Juana de la Torre

Juana de la Torre, Sales Director

Coloring the world since 1992

TISSUE CULTURE

Plant Tissue Culture is a plant in which its cells and tissues have been propagated in a sterile media to produce genetically identical plants. This technique is used with various objectives: seed germination, vegetative multiplication, breeding virus free plants, hybrid breeding, etc. It also has various advantages such as: convenience in the clone propagation, selection and maintenance, combinations of one or more genotypes of an specific plant, guarantees health status, and the ability to create new plants through unrelated families.

Alstroemeria

-

Alstroemeria is a symbol of something very important, lasting friendship. Each flower has six petals and each petal is a symbol of one of the most important facets of friendship: patience, understanding, commitment, respect, humor and empathy.

Planting Density: 3.2 plants/m²

Delphinium

-

Delphinium, a word derived from the Greek word for “dolphin”, was named after its bloom’s shape which looks like a leaping dolphin when seen from its side. The tall, vertical delphiniums are always aiming high; this is why they are widely associated with success and achievement. One of the only true blue flowers brings us back to the ocean, making them soothing, but also powerful and strong.

-

SUNSHINE SERIES

- Desired variety not only because of strong, tall, sturdy stems and big strong, true blue single florets but also because of its spray habitat and flowers that open all on top – hence, it is a perfect for bouquets
- A tissue-culture breeding breakthrough, it is highly programmable and provides very uniform blooming
- A novelty choice for commercial cut-flower growers and consumers – provides a true blue element to flower arrangements

Stem Height: 60 cm
 Crop Time: 12 weeks from planting to harvest
 9-10 weeks from prune to harvest
 Planting Density: 10-12 plants/m² net (2-2.25 plants/ft² net)

WALTZ SERIES

- The Delphinium Waltz series is the commercial variety known all over due to its full flowered spike with richly true blue colored, shatterless flowers
- Single flower with strong vibrant blue colors that makes the variety unique
- This series features tall, strong and sturdy stems with evenly situated flowers
- Highly programmable when pruned
- Very versatile plant. You can get very tall thin stems doing stem selection in the field, or thinner and smaller spikes for the bouquet market

SEA WALTZ

SKY WALTZ

Stem Height: 100 cm
 Crop Time: 10 weeks from planting to harvest
 9 weeks from prune to harvest
 Planting Density: 10 plants/m² net

TRICK SERIES

- Delphinium Belladonna Trick series is a perfect variety to show you are a leader in flower trends
- Highly productive variety since new shoots continuously develop
- The size of flower spikes is not as robust as the commercial belladonna types making it perfect for mixed bouquets or CB's
- Unique colors never seen in Delphinium plants before such as yellow and pink
- Unique flower that resembles Orchids, giving a wild look to arrangements

YELLOW

PINK

LAVENDER

Stem Height: 60 cm
Crop Time: 9 weeks from planting to harvest
8 weeks from prune to harvest
Planting Density: 12 plants/m² net (2.3 plants/ft² net)

Limonium

-

Limonium, comes from the Greek word "meadow" that refers to its original habitat. Limonium originally grew in meadows along the sea in the Mediterranean. This flower brings to our homes the fresh feeling of being warm and relaxed in a breeze meadow in the Mediterranean. Limonium symbolizes remembrance, success, sympathy and beauty.

-

PERENNIAL SERIES SILVER PINK

- This new series is fresh, essential and back in fashion for bouquets, corsages, and flower arrangements
- The light pink color brings delicacy and elegance to flower arrangement and is very much in style
- Very productive and hardy plant compared to its competitors
- The calix and flowers are firmly located in the stems, preventing them from shattering

Stem Height: 80 cm

Crop Time: 26 weeks from planting to harvest

Planting Density: 6 Plants/m² net (1 plant/ft²) spaced in a quincunx pattern with 40cm between each line.

PERENNIAL SERIES SHOOTING STAR

- Limoniums are great fillers for bouquet arrangements. The plant structure create branches that give a lot of volume with just one stem
- The bright purple color brings life to this plant
- Very hardy and productive plant that is more resistant to pest an diseases than its competitors

Stem Height: 80 cm
Crop Time: 26 weeks from planting to harvest
Planting Density: 6 Plants/m² net (1 plant/ft²) spaced
in a quincunx pattern with 40cm between each line.

PERENNIAL SERIES SKYLIGHT

- The first true odorless hybrid Limonium in the market
- One of the most productive plants of its type
- Very hardy and resistant to pest and diseases
- Low mortality rate
- Soft purple color that is in demand

Stem Height: 80 cm

Crop Time: 26 weeks from planting to harvest

Planting Density: 6 Plants/m² net (1 plant/ft²) spaced in a quincunx pattern with 40cm between each line.

SINUATA SERIES

- The tissue-culture series combine sharp, solid colors and big panicles suitable for bouquets and solid bunches
- Can be dried and will keep the color intact for a long period of time

Echinacea Purpurea

-

Echinacea Purpurea, also known as coneflowers, originates from the North-East of the US, where the prairies would turn a deep orange in late summer. In natural medicine the plant has proven itself as a medicine for many winter ailments, but we prefer them as cut flowers. Because of such characteristics, these flowers are associated with **strength and healing.**

CUTTINGS

Cuttings are asexually propagated plants used for identical genotype plant production. Our highly trained personnel specializes in selecting the highest quality cuttings that yield only the best plants, certified to be free of plagues, virus and pathogens. The advantages of this propagation technique are high-quality materials, homogeneous plant behavior and reduced plant loss during planting. Ball SB can provide either rooted or unrooted cuttings based on customer preference.

Achillea

-

Achillea, also known as Yarrow, was named after the ancient Greek hero Achilles. According to legend, Achilles used Yarrow to treat his and his soldier's wounds during the Trojan War. **Achillea** is a symbol of healing and protection.

-

SASSY SUMMER SERIES

Chrysanthemum

-

Chrysanthemum, commonly referred as mums, was named after the Greek word chrysos, meaning gold, and anthemion, meaning flower = Golden flower.

The Chrysanthemum is the flower for the month for November and it has a wide variety of meanings across the globe. Our favorite is the Asian meaning that signifies life and rebirth making them great gifts for birthday and babyshowers.

TERRACOTA

Dahlia

-

Dahlia species, native from Mexico, is considered one of the most beautiful flowers in the world. It has associated many meanings derived from its appearance but one of the strongest associations with the flower is: "Remaining graceful".

Her unique appearance and beauty reminds us of a beautiful woman who always keeps her standards and her morals at a high level. If Dahlia flower was a person, it would have royal manners and graceful nature. We can learn a lot from this flower and always keep our behavior under control no matter how hard it might seem to us. Staying graceful in life and respecting others is going to pay off to you in the future, and it will completely change the way others see you.

Dianthus

-

One of the world's oldest cultivated flowers, the **Dianthus** is considered the "Flower of the Gods" or a divine flower. It symbolizes passion, fascination, admiration, affection, love and gratitude. Their versatility can result in a sweet, "chic" or delicate-looking arrangement, as well as a wild- looking bouquet coming out of the amazon jungle.

-

GREEN BALL SERIES

- Non-flowering Dianthus that features green showy spikes of light green ball shaped flower
- The flower that the market has been asking for: different, focal and green
- Dark, glossy, long leaves on strong stems make it suitable for solid bunches
- Perfectly-round, green heads about 6 cm in diameter provide bouquets with a never-before-seen texture and look

Stem Height: 50-60 cm
Crop Time: 18 weeks from planting to harvest
Planting Density: 40 plants/m² net (3-4 plants/ft² net)

PUNKY BALL

- New non-flowering Dianthus barbatus with big round steam heads, thicker stems and more vigorous plants.

Stem Height: 50-60 cm
Crop Time: 19 weeks from planting to harvest
Planting Density: 42 plants/m² net (3-4 plants/ft² net)

COCOA BALL

- Dianthus barbatus with flowerless light brown round steam heads thick steams. Highly productive rustic plant.

new

Stem Height: 50-60 cm
Crop Time: 19 weeks from planting to harvest
Planting Density: 42 plants/m² net (3-4 plants/ft² net)

Gypsophila

-

Also known as baby's breath, **Gypsophila** was a big trendy flower in the 1990s that has come back in style. Its name comes from the word gypsum, a mineral present in the soil that makes a very heavy and thick ground. Gypsophila symbolizes long lasting or eternal love, and is present in many love binding ceremonies such as weddings and baptisms. The meaning comes from the pure white color of the flower because it can be an eternal flower when used dry. The white tiny flowers also show the purity of emotions that people should have for each other. Following this line, Gypsophila reminds us to stay dedicated to your cause and to remember the power of innocence and purity.

-

SNOW BALL

- The new big flower Gypsophila from the Ball Series – a go-to flower for producers & consumers
- This new generation of Gypsophila was bred with sustainability in mind – just like our Gypsophila Mirabella, these new varieties do not require additional lighting, reducing energy usage
- Very strong after pruning

Stem Height: 80 cm
 Crop Time: 20 weeks from planting to harvest
 18 weeks from prune to harvest
 Planting Density: 6 Plants/m² net. Plants are spaced
 in a quincunx pattern with 40 cms between plants.

MIRABELLA

- Favorite medium size flower Gypsophila
- Similar to the Snowball, Mirabella does not require additional lighting to flower
- Has an upright plant structure with long internodes to prevent tangling, reducing loss of flowers in packing
- Very hardy plant with low mortality rates

Stem Height: 80 cm

Crop Time: 20 weeks from planting to harvest

18 weeks from prune to harvest

Planting Density: 6 Plants/m² net. Plants are spaced in a quincunx pattern with 40 cms between plants.

DISCOVERY

-

- New small flower Gypsophila in the market – has a small flower with bell like shape petals that give elegance to the flower
- Resistant to Leaf Miner resulting in the need for fewer pesticides
- Similar to Mirabella, has an upright flower structure that prevents tangling and reduces packing loss

Stem Height: 80 cm
Crop Time: 20 weeks from planting to harvest
18 weeks from prune to harvest
Planting Density: 6 Plants/m² net. Plants are spaced in a quincunx pattern with 40 cms between plants.

MINIBELLA

-

- New this year from Ball SB, a new small flower gypsophila with round and full flowers
- Very hardy plants with low mortality rate
- A great Gypsophila for producers, consumers and the planet – this new generation of Gypsophila, from the same line of Mirabella and Snowball, does not require additional lighting to flower

new

Stem Height: 80 cm

Crop Time: 20 weeks from planting to harvest

18 weeks from prune to harvest

Planting Density: 6 Plants/m² net. Plants are spaced in a quincunx pattern with 40 cms between plants.

NEW BY BALL

Diameter: 11.5 mm
 Cycle: 15 – 16 Weeks
 Harvest: 3 – 4 weeks
 Compact Flower
 Opening Room: 6 dias
 Very white color
 Easy to harvest due to its closed lateral angle
 Stem weight: >38g

Hydrangea

-
The word **Hydrangea** comes from the Greek
“Hydor”, meaning water and “angos” meaning
vessels. According to a Japanese legend,
Hydrangeas are associated with heartfelt
emotions, gratitude for understanding and apology
as an emperor gave them to the family of the girl
he loved to make up for neglecting her.
-

HYDRANGEAS BY BALL

- New look Hydrangeas!
- Novelty colors.
- No color change with pH.
- Bi-colored petals and leaves add value to hydrangea

new

Stem Height: 60 cm
Crop Time: 52 weeks
Planting Density: 4.5 Plants/m² net.

SEEDS & PLUGS

Seeds, the beginning of the journey: wild cells at the brink of creation. Encapsulated in the tiniest form is all the diversity offered by Ball to bring beauty and emotions to millions of people and to color the world with our genetics.

Plugs/Young plants grow in single units in modular trays, this allows for minimum root disturbance when planting. They are a ready to plant unit, having been professionally nurtured through propagation & early growth stages.

Ammi majus

-
Originally from Egypt and has managed to spread throughout the Mediterranean Sea basin, and later around the world. Ammi comes from the Greek word that means "sand" and that refers to the habitat of the plant and Majus that means with "long petals".
-

WHITE LACE FLOWER

Stem Height: 80 cm
Crop Time: 12-13 semanas de siembra a cosecha
Planting Density: 12 plantas/m²

Anemone

-

Anemone, also known as Poppy Anemone, comes from the Greek word that means “the wind’s daughter”. This flower grown mainly in spring is associated with the arrival of spring breezes, transporting you to the warmth and happiness that comes when seasons change from the cold winter to the warm, colorful and breezy spring.

-

MONA LISA SERIES

Dusty Miller

-

Dusty Miller was brought to the cut flower business from the gardens. It is a plant in the family Asteraceae and originates from the Island of Capraia in Italy, where it is called “fiordaliso delle scogliere” meaning cornflower of the cliffs. This bedding plant item has arrived to give our flower arrangements a garden look that is very much in fashion. Its silver color, that complements the pastel colors in the arrangements, symbolizes the moon and is commonly associated with elegance, prestige and wealth.

-

SILVER DUST

- Silver, serrated, feather-like, velvety leaves
- Perfect for use as filler or foliage in flower arrangements, separating bright colors or framing showy shrubs like roses
- Gives enough length to put in flower arrangements when cultivated with the right procedures

Stem Height: 60-70 cm
Crop Time: 20 weeks from planting to harvest
Planting Density: 24 plants/m²

NEW LOOK

- One of the most productive and unique foliage plants around
- This special Dusty Miller features tall, thick stems with large, smooth-edged silver leaves
- The more you pick it, the more stems it produces
- Ready to cut in just four months from sowing – this hardworking plant will reward you with buckets and buckets of fuzzy silvery foliage all season long

Stem Height: 60-70 cm
Crop Time: 20 weeks from planting to harvest
Planting Density: 24 plants/m²

Flowering Kale

-

From the kitchen to your vase, **Flowering Kales** give a rose-like shape to arrangements. Native to Europe, these cool weather plants grow a mounded rosette with color in their ruffled, feather leaves. It adds a splash of white or red to arrangements along with green accents.

-

CRANE SERIES

- Flower size is adaptable by adjusting the density and water
- Tall upright habit with compact shiny leaves
- Perfect for adding the desired different touch to your bouquets
- Special Pinch to make them Rositas
- Crane Ruffle: More vigorous growth habit than the other Crane series

Stem Height: 70 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

RUFFLE ROSE

CRANE FEATHER SERIES

- A different look in Brassicas, this series has very serrated leaves
- The first uniform feather leaf kale offers two distinct colors, excellent stem length for easy harvest and uniform habit
- Adds texture and interest to floral arrangements

KING WHITE

QUEEN RED

Stem Height: 60 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

FLARE SERIES

- Early maturing.
- In addition to being extremely uniform, it's very easy to get tall stems with this series.
- Flare White is well suited for dying.
- Flare's leaves have a gentle ruffle along their edges adding to their beauty.

WHITE

ROSE

Stem Height: 80-90 cm
Crop Time: 14 weeks from planting to harvest
Planting Density: 80 plants/m²

DREAM SERIES

- The dark leaves that surround the center area enhance the center color for a great contrast
- The brightness of the flower color depends on production temperature (lower is better)
- The big advantage of the new Dream series, compared to existing commercial varieties, is that it fixes the color more intensively, and the heads are more compact, giving an overall nicer look
- Yields a thinner stem, better for shipment
- Special Pinch to make them Rositas

RED

WHITE

RED ROSITA

Stem Height: 70 cm
Crop Time: 12 weeks from planting to harvest
Planting Density: 80 plants/m² net (8 plants/ft² net)

WHITE LADY SERIES

- Flowering Kale White Lady is very versatile focal flower – the green center with darker and shiny leaves provides a great contrast with z flowers
- Very white leaves with dark green thin line in the rim of the leaves gives this Flowering Kale a unique look

Godetia

-

Godetia also goes by the names Farewell-To-Spring and Clarkia, the latter honoring Captain Clark of the Lewis and Clark expeditions as the story tells that they discovered the flower in the west coast, especially in California although Godetia's can be found all over North and South America.

Godetia stands for fascination, sincerity and love

Lisianthus

-

Lisianthus, native to dry areas, also called the “rose of the South”, come from the humble origins of the South American meadows, however, bouquets containing Lisianthus are not humble at all. This high profile and elegant looking flower requires specific conditions to germinate and grow, but it comes out to be a hardy and strong plant, which symbolizes to rise above your surroundings and to be grateful. Lisianthus is becoming more and more popular due to its beautiful delicate appearance with strong stems and petals.

-

ABC SERIES

- Double flower Lisianthus with high petal counts
- Uniform plants finish 1 to 2 weeks before competitive varieties and reduce sensitivity to rosetting
- Plugs finish 1 to 2 weeks faster than comparable varieties and produce uniform crops
- Lisianthus flowers are not Ethylene sensitive, therefore do not shatter and are easy to ship
- ABC series comes in types 1, 2 and 3, so its available to grow in different conditions and seasons

Marigold

-
Marigold has strong ties to the sun and its power to resurrect. Many considered it a symbol of despair and grief, linking it to the Mexican remembrance of the dead during “Día de Muertos”. It also has a more modern perspective focusing on the sunny colors bringing optimism and success.
-

MARIGOLD COCO

- A vintage, colorful “day of the dead look “, especially trendy after James Bond and Disney Coco movies brought the marvelous festivities into world view.
- Perfect for summer and fall.
- Excellent focal flower due to its flower size and solid strong orange and yellow color.
- Presents a very round flower with a very inconspicuous green center.
- Very versatile flower provides a summer cottage look and offers bright, solid colors.

YELLOW

GOLD

ORANGE

Stem Height: 98 cm

Crop Time: Production starts 11 weeks after planting with peak production in week 12

Planting Density: 80-100 plants/m² net

MARIGOLD XOCHI SERIES

- Xochi delivers stronger stems and richer colors than other commercial varieties. Xochi means “flower” or “princess of flowers” and is a shortened version of Xochitl, an ancient Aztec word used in Spanish today, most commonly in Mexico. Xochi offers the uniformity, good shipability and durability to meet the increasing consumer demand for Día de los Muertos and Halloween celebrations; good for use in bouquets and grower bunches.
- Stronger peduncles than normal that will permit you to produce bigger heads that won't brake during shipping or when handled.
- Size and color are perfectly stable.

new

Stem length: 61-91 cm

Crop time: 11 weeks from planting to harvest

Plant density: 80-100 plants/m² net (7-9 plants/ft² net)

MARIGOLD CHEDI SERIES

- Large and firm flowers with a long shelf life.
- Beautiful uniform flower shape.
- Continuous flowering in the field.
- Chedi is tolerant to soil borne diseases including fusarium.

new

YELLOW

ADDITIONAL COLORS: Gold.

Stem length: 65-95 cm
Crop time: 10-12 weeks from planting to harvest

Planting Density: 80 plants/m²

Moluccella

-

Ironically, this variety that comes from Syria and Turkey, is called “**Bells of Ireland**” because of the vibrant chartreuse-green color of its spikes. Green is the color of the Irish and its also the color of good luck. For the superstitious, it is the flower to have around at home when you need a little bit of extra luck.

-

MOLUCCELLA / BELLS OF IRELAND

- Lightly scented plant that produces a gorgeous, green bract, which surrounds the rather inconspicuous flowers
- Molucella is a very versatile commercial flower - the spiky stems make an interesting and long-lasting fresh cutflower arrangement
- Can be use as a green vertical to give altitude to arrangements

Stem Height: 38-51 cm
Crop Time: 14 weeks from planting to harvest
Planting Density: 80 plants/m² net (7 plants/ft² net)

Panicum Capillare

-

Panicum Capillare, known by the common name witchgrass, is a species of grass.

Airy cut flower filler, adds sparkle to bouquets. Quietly the stems grow, forming tiny flowers which then give way to the seeds and "explode" into a wondrous, shimmery panicle of marvel! Not a fussy plant, this ornamental grass is fabulous as a cut-flower bouquet filler. Excellent for drying as well.

-

PANICUM CAPILLARE

First place winner at Proflora 2019 in Fillers Category.

Snapdragon

-

Snapdragon. This mystical flower resembles a Dragon's head when squeezed. As the character it resembles, the snaps are seen as graceful flowers but with inner strength and fire within. It can have two different meanings: graciousness and deception, and sometimes also seen as a charm against falsehood.

-

POTOMAC SERIES

- Potomac series produces tall, strong, sturdy and clean stems, as well as long and well-defined spikes with good flower quality
- Well-suited for solid bunches and bouquets
- Outstanding colors and flower quality plus shatter resistance makes Potomac ideal for production during periods of high light, long days and warm temperatures (Group 3, 4)
- Can be grown year round

Stock (Matthiola)

-

Stock, symbolizes enjoying life, even when its not exactly how you want it to be. It is seeing the beautiful in the ugly and silver lightning in the dark, so it can be used to celebrate anything that brings you happiness. It symbolizes eternal beauty as well, making them perfect for everyday flowers to lift up your mood. Their soft aroma gives a fresh atmosphere to your environment.

-

IRON & EARLY IRON SERIES

- Bred in Japan, the Iron Standard Stock has the strongest stem compared to competitors
- Very compact spike, which makes it look with fuller blossoms
- Comes in wide variety of solid, strong colors as well as pale pastel colors, so it fits all types of occasions

Sunflower

-

Nothing feels more like summer than **Sunflowers!** Native from North America, the old-time favorite is not only named after, but also resembles the sun. It's no surprise that we see these flowers in paintings by renowned artists from around the world. This flower brings and spreads warmth, happiness, power and strength. Always facing the sun, the sunflower seeks positivity and strength since it is always looking towards the bright side. Its vibrant yellow and orange petals always brighten the mood.

-

VINCENT SERIES

- New favorite due to the upward-facing blooms and bountiful overlapping petals
- Also provide abundant and eye-catching color
- Feature the well-loved combo of brown centers and deep orange petals – an excellent choice as a summer and fall flower and for year-round decoration

CHOICE

FRESH

Stem Height: 90 cm

Head Diameter 8.9 cm

Trachelium

-

The genus name comes from the Greek word “trachelos” meaning neck. This references the plant’s use in traditional herbal medicine to treat sore throats and other tracheal ailments. This also explains the common name throatwort.

Trachelium plays versatile roles in floral work, working well as a filler in both fresh and dry arrangements. It is especially prized for its interesting texture, umbrella-like shape, full clusters and broad availability in colors. Its flowers also feature a delicate scent, similar to lilac.

-

LAKE MICHIGAN

-
A sky blue umbel with a distinctive, sweet scent displaying a profusion of delicate, tiny, star-shaped, lavender-blue flowers.

Elegant plants with long stems ideal for cutting, and they last at least a week in a vase

-

BLUE MUREX

- Retains its beauty color and form when cut for several weeks.
- Top quality of pastel blue is suitable for filler or line of the arrangements.
- Good holdability on post harvest and base life.

new

Stem Height: 80 cm
Crop Time: 17-20 weeks
Planting Density: 40 plants/m²

Tweedia Caerulea

-

Tweedia was derived from the sur name of James Tweedie whom by the mid of the 19th century was the head gardener of the Royal Botanic Garden in Edinburg. After he immigrated to South America, he would traveled throughout the continent sending the plants that he found back to Scotland. Tweedia is known for its distinctive turquoise blue star-shaped flowers and greenish felted leaves symbolizing peace and harmony. Its five-petaled flowers bloom in loose clusters, which give way to boat-shaped seedpods.

-

TWEEDIA CAERULEA

- Another true blue flower
- Soft velvety leaves
- Vibrant green stems and leaves that contrast with the vibrant color of the flower
- Distinctive star-shaped flowers perfect for a bridal bouquet, a grooms' boutonniere or in center pieces.

BLUE DOUBLE

PINT WHITE DOUBLE

PURE WHITE

PURE BLUE

Stem Height: 40 – 50 cm

Zinnia

-

A symbol of endurance, they are also one of the longest blooming flowers. You can count on a gorgeous show of color from early summer to the first frost. Thoughts of friends or thoughts of a missing friend are the most common meanings for the **Zinnia**.

-

QUEENY SERIES

- Long lasting dahlia-like blooms sit atop sturdy, compact plants.
- Flower evolve from dark coral /peach/Orange to light peach with a dark center as they age.

LIME ORANGE

Stem Height: 55 cm
Crop Time: 10 weeks from planting to harvest
Planting Density: 77 plants/m²

BULBS

Flowering bulbs have can store energy from one growing season to the next. When a bulb starts to grow, it uses these stored reserves to develop roots, shoots, leaves and flowers. Being so self-sufficient means that flower bulbs don't have to wait for perfect weather or ideal soil conditions. By nature, they already have what they need to thrive.

Lilies

-

Lilies most commonly mean devotion or purity. Because of the Greek myth of Hera and Zeus, lilies are associated with rebirth and motherhood. According to the story, when Zeus wanted baby Hercules to drink the milk from Hera, as she was not the birth mother, she refused. Zeus brought Hercules to Hera to drink her milk while she was sleeping, but she awoke and pushed him away. The drops of milk that spilled on the ground grew into lilies.

-

ASIATICO SERIES

- Can reach stem height up to 1.8 m
- Long, thinner and brilliant petals
- No fragrance

BRUNELLO

TRESOR

LA SERIES

- Hybrid between *L. longiflorum* and Asiatic hybrid
- Upward phasing cup shape flower

LITOUWEN

YELLOW DIAMOND

EREMOS

Callas

-

The calla lily was named after the Greek word for beautiful — calla. It is associated with the Greek goddess Hera. According to the legend Zeus brought Hercules, his son from another woman, to Hera, his wife, while she was asleep to drink her milk. When she woke up she pushed him away and drops of milk flew across the sky to create the milky way. The ones that fell on the ground grew into beautiful lilies. The most common meaning for calla lilies is purity, holiness, and faithfulness. Calla lilies are also symbols for rebirth and resurrection, tied to the resurrection of Jesus in part because they bloom around Easter and in part because they are shaped like trumpets which symbolize triumph.

-

CALLAS

- Sturdier stem
- Rounder form of flower
- Better flower production.
- Long Lasting flowers
