Breeding Technology Centre

Bringing ornamentals into the era of predictive breeding

Horticultural breeding is transitioning from conventional to predictive breeding and Dümmer Orange® is the driving force behind this. Our Breeding Technology Centre in the Netherlands is the largest horticultural breeding laboratory in the world. A high-tech home for international pioneering scientists, breeders and specialists to set new standards in flower and plant genetics and breeding excellence.

Moving away from relying on conventional processes to develop flower and plant varieties, predictive breeding is using large data-sets on plant

performance and a high-end IT infrastructure to achieve breeding goals faster and more reliably. Technology-driven breeding will allow the ornamental industry to become more sustainable, by using state-of-the-art breeding tools to develop novel resistance traits.

We believe in the power of innovation and lead the way in the use of modern breeding tools and prediction software for faster creation of high-impact varieties. We assure you get the best, and better every time.

Discover Intrinsa™ plants powered for a greener future.

Intrinsa™ brings advanced techniques through traditional breeding with the ambition of creating sustainable and economically viable plants for a greener future.

Connecting the world

Intrinsa allows for greater accessibility of plant material produced from more countries worldwide for a broader availability to your garden.

Transforming supply

Intrinsa advanced breeding techniques help make crops more reliable for greenhouse and nursery growers, ensuring a steady supply of your favorite blooms.

Making homes and gardens greener

Intrinsa technology identifies unique DNA patterns with natural disease resistance, reducing pesticide needs using these innate genetics.

Invest in the future

By investing in the Intrinsa™ brand

Stronger, healthier plants

By advanced breeding technology

True beauty comes from within

Plant power breeding by Intrinsa™

Look for the icon

Look for the icon throughout this catalog to identify worry-free varieties for a more sustainable and economically protected future.

Achten Sie auf das Symbol

Achten Sie im Katalog auf das Symbol, das die Sorten kennzeichnet, die Ihnen eine sorgenfreie, nachhaltige und wirtschaftlich sichere Zukunft bieten.

Zoek voor het icoon

Zoek in deze catalogus naar het Intrinsa-icoon en ontdek welke rassen geschikt zijn voor een duurzamere en economisch zekerere toekomst.

DE Entdecken Sie Intrinsa™ - optimierte Pflanzen für eine grünere Zukunft.

Intrinsa verbindet modernste Techniken mit traditioneller Züchtung, um nachhaltige und wirtschaftlich interessante Pflanzen für eine grünere Zukunft zu entwickeln.

NL Ontdek Intrinsa™ - planten voor een groenere toekomst.

Intrinsa verbindt de modernste technieken met traditionele veredeling, met als doel het ontwikkelen van duurzame en economisch interessante gewassen voor een groenere toekomst.

FR Découvrez Intrinsa™ - des plantes optimisées pour un avenir plus vert.

Intrinsa apporte des techniques de pointe à l'hybridation traditionnelle, l'ambition est de créer des plantes durables et économiquement viables pour un avenir plus vert.

IT Alla scoperta di Intrinsa™ - piante potenziate per un futuro più verde.

Intrinsa porta tecniche d'avanguardia nell'ibridazione tradizionale; l'ambizione è quella di creare piante sostenibili ed economicamente valide per un futuro più verde.

ES Descubra Intrinsa™ - plantas potenciadas para un futuro más verde.

Intrinsa aplica técnicas avanzadas a la hibridación tradicional con el anhelo de crear plantas sostenibles y económicamente viables para un futuro más verde.

Cherchez l'icône

Dans ce catalogue, cherchez l'icône identifiant les variétés sans souci, pour un avenir plus durable et économiquement sûr.

Cercate l'icona

In tutto questo catalogo, cercate l'icona che identifica le varietà che vi offrono libertà dalle preoccupazioni, con un futuro più sostenibile ed economicamente tutelato.

Busque el icono

Busque en este catálogo el icono que identifica las variedades que le ofrecen olvidarse de las preocupaciones, para lograr un futuro más sostenible y económicamente viable.

Imagine a future... Where tobacco mosaic virus is a worry of the past

EN The Solution

Resistant plant sources are identified by inoculating breeding material with the virus and testing the level of resistance under controlled conditions favorable for TMV development. Resistant plants identified through this method are then used as starting material in the breeding process.

DE Die Lösung

Resistente Pflanzenquellen werden identifiziert, indem das Züchtungsmaterial mit dem Virus infiziert und der Grad der Resistenz unter kontrollierten, für die TMV Entwicklung günstigen Bedingungen getestet wird. Mit Hilfe dieser Methode können resistente Pflanzen erkannt und als Ausgangsmaterial für den Züchtungsprozess verwendet werden.

NL De oplossing

Resistentie in planten kan worden geïdentificeerd door plantmateriaal te inoculeren (inenten) met het virus en vervolgens het resistentieniveau te testen onder gecontroleerde omstandigheden die gunstig zijn voor de ontwikkeling van TMV. Met de resistente planten die op deze wijze zijn geïdentificeerd, wordt uiteindelijk verder veredeld.

FR La solution

Les sources végétales résistantes sont identifiées en inoculant le virus au matériel d'hybridation et en testant le niveau de résistance, dans des conditions contrôlées favorables au développement du TMV. Les plantes résistantes identifiées grâce à cette méthode sont ensuite utilisées comme matériel de base pour le processus d'hybridation.

IT La soluzione

Le fonti vegetali resistenti vengono identificate inoculando con il virus il materiale per l'ibridazione e testando il livello di resistenza in condizioni controllate che favoriscono lo sviluppo del TMV. Le piante resistenti individuate con questo metodo sono poi utilizzate come materiale di partenza nel processo di ibridazione.

ES La solución

Las fuentes vegetales resistentes se descubren inoculando el virus en el material de hibridación y haciendo pruebas del nivel de resistencia en condiciones controladas que favorecen el desarrollo del TMV. Las plantas resistentes descubiertas con este método se utilizan luego como material de partida en el proceso de hibridación.
